GENUINE OAK EDGE UPPER SHELF

Another Storflex exclusive. Merchandisers who are looking for a custom wood look should consider Storflex Oak Edge Shelf. To enhance merchandising presentation, Storflex has engineered an oak trim molding made of genuine red oak. Storflex Oak Edge is an integral part of the standard upper shelf. Customized to exactly fit our steel shelving profile, which means a flush continuous shelf surface with genuine wood that looks good. Contains a milled 1.25" edge to accommodate price inserts. Retains all of the great features and strength of Storflex upper shelves, and, by adding oak end panels, a "custom wood" presentation is complete.

Ships factory installed with 3 coats of extra durable polyethylene sealer.
